

4. Upload the .zip file I provided:

The .zip file should contain the following files:

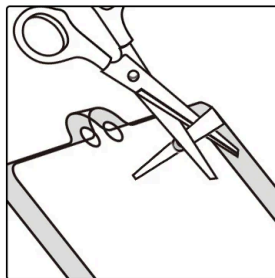

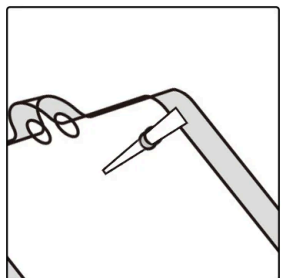

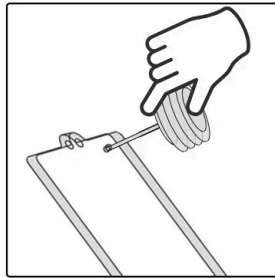

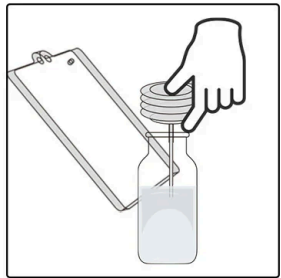

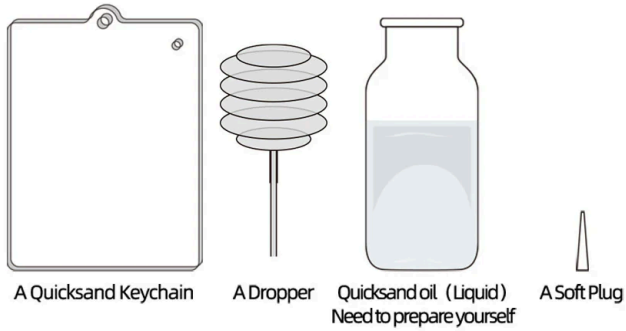

-  00_setup diagram
-  back layer
-  mid layer
-  top layer

5. Select the minimum order quantity (note that the minimum order quantity is 5 units):

6. When checking out, in the order notes write “Please send proofs for confirmation of transparent layers”; Vograce will then send you the printing proofs of your keychain and you can confirm whether they all look correct and whether the cut lines are placed where they should be.
7. If everything looks good, confirm the proofs and your keychains will be produced and sent to you!
8. Once you receive them, they will come with a dropper for filling in the oil. You’ll need to get oil yourself. Some people use baby oil, but personally I use [this one](#). You can choose the deposition speed (how fast the glitter falls) according to your personal preference, I would recommend fast or medium. *If you don't want to bother with filling the keychains yourself, try option B below.*
9. Once you have all the materials, follow Vograce’s guide on how to fill the keychains:

Operational guide

(Optional Accessories)

The newly upgraded accessories can be easily filled with liquid sand through pouring, making oil infusion convenient and allowing for easier squeezing of oil into the liquid sand.

10. Remember to remove the protective film on both sides of your keychains for a glossy, scratch-free look!

Option B: Prefilled Keychains (I have not tried these myself yet, but it seems like a good way to avoid the hassle of getting the oil and filling them yourself)

1. Go on the Vograce website, find the listing for [Custom Pre-filled Quicksand Liquid Keychains](#)
2. Follow the steps 2-7 from the method above.
3. The keychains should be delivered already filled, so when you get them all you need to do is peel the protective film on both sides and enjoy!

Regular Keychains

1. Go on the Vograce website, find the listing for [Custom Clear Acrylic Keychains](#)
2. Choose the specifications:
 - a. Double sided different design if you have a front & reverse chibi
 - b. I usually go for no additional technique, but you can choose holo or glitter options according to your preference
 - c. For chibis I usually go for 3.5" / 88.9 mm size
 - d. Choose your preferred style of clasp
3. Upload both the front and reverse images in a .zip file
4. Select the quantity (MOQ is 3 units)
5. When checking out, in the order notes write "Please send proofs for confirmation of transparent layers"; Vograce will then send you the printing proofs of your keychain and you can confirm whether they all look correct and whether the cut lines are placed where they should be.
6. If everything looks good, confirm the proofs and your keychains will be produced and sent to you!
7. Remember to remove the protective film on both sides of your keychains for a glossy, scratch-free look!
